April 2023 Issue 01

# SEgoesGreen

We are excited to announce the beginning of our effort to integrate nature-based solutions into higher education to harness the transformative potential of the social economy for a green and inclusive future. Our aim is to equip future leaders with the knowledge and skills needed to address urgent environmental challenges, and we believe that by working closely with a diverse group of partners, we can develop a comprehensive and impactful approach.

Co-funded by  
the European Union

## Our consortium partners include:

A regional development agency that supports economic growth and innovation in the region of Rzeszow

An innovation hub that supports startups and entrepreneurs in developing sustainable business models and solutions.

A leading academic institution that provides teacher education and conducts research in education and pedagogy.

A comprehensive university that offers undergraduate and graduate programs in various fields, including social sciences, economics, and environmental studies.

A non-profit organization that conducts interdisciplinary research and education in environmental sustainability, social justice, and peace.

The oldest and largest university in Croatia, offering a wide range of undergraduate and graduate programs in various fields, including environmental science and engineering.

A non-profit organization that promotes sustainability and climate action through research, education, and advocacy.

At this stage, we are conducting desk research to gather information and insights that will inform the development of our curriculum and approach. Our research will cover a wide range of topics, including the benefits and challenges of nature-based solutions, the role of the social economy in promoting sustainability and inclusivity, and the representation of eco-citizenship in higher education.

We are committed to working closely with stakeholders from various sectors to ensure that our efforts are aligned with the needs and priorities of the wider community. We believe that by bringing together experts and practitioners from academia, government, NGOs, and the private sector, we can develop a comprehensive and impactful approach to this important issue.

Over the coming months, we will be sharing updates on our progress, including the results of our research, the development of our curriculum, and our plans for pilot projects.

*Don't forget to follow us on social media to stay updated on the latest news and developments from SEgoesGreen!*
